

Dark Sky Drawing Worksheet

Dark Sky Drawing Worksheet

Learn about light pollution and how to protect our night skies through drawing and activities. Perfect for students, schools, and families. Let's make the stars shine again!

Dark Sky Drawing Worksheet

Activity 1: Spot the Stars!

Draw a city night sky and a village night sky. Use stars, buildings, lights, and the moon to show the difference. Which one has more stars? Why?

Dark Sky Drawing Worksheet

Activity 2: Draw Your Night Sky

Imagine the perfect night sky without light pollution. What would it look like? Use this space to draw it. Add stars, constellations, or planets!

Dark Sky Drawing Worksheet

Activity 3: Color the Types of Light Pollution

Use different colors to show these 4 types of light pollution:

1. Skyglow: Light dome over cities
2. Glare: Too bright lights hurting our eyes
3. Light Trespass: Light entering homes at night
4. Clutter: Too many lights in one place

Label each and color them differently!

Dark Sky Drawing Worksheet
